PRODUCT PORTFOLIO
CertPOS · EduBridge · Patiya · HRFlow

CORPORATE INTRODUCTION

Most organisations don't need more software. They need systems that fit how they actually work.

Cynaut Technologies is a Ugandan software development and technology solutions company. We build our own software products, engineer custom systems for organisations, and partner with institutions on digital transformation.

Across Uganda, much of the work that keeps an organisation running still happens in notebooks, paper registers and spreadsheets. Owners see money coming in but not what they are really making; managers wait for end-of-week reports.

We close those gaps with homegrown software products that organisations can adopt quickly, and with the engineering capability to build bespoke systems when a product will not fit — all implemented and supported by our own team in Kampala.

THE PROBLEMS WE SOLVE

~~Paper records, notebooks and spreadsheets~~

→

Secure digital records

Sales, stock, learners, staff and fees captured once, at source, and available wherever they are needed.

~~Decisions made on yesterday's numbers~~

→

Real-time visibility

Live dashboards and reports that show leaders what is happening now — across every branch, rep or class.

~~Disconnected tools and manual processes~~

→

Integrated, automated operations

Workflows that connect payments, inventory, people and reporting, so routine work happens automatically.

INTELLECTUAL PROPERTY

4

Proprietary products in market

CertPOS, EduBridge, Patiya and HRFlow — owned and developed in-house.

REACH

250+

Businesses served[1]

Across retail, education, hospitality, professional services and the public sector.

TRACK RECORD

6+

Years delivering software[1]

Building, implementing and supporting systems for Ugandan organisations.

BUSINESS MODEL

3

Complementary business lines

Proprietary products · Custom engineering & services · Transformation & partnerships.

[1] Company-reported figures, as published at www.cynaut-tech.com (November 2026).

WHO WE ARE

A software company with three complementary strengths.

We are a Kampala-based team of engineers, designers and trainers. We turn business challenges into working software — and stay to make sure it delivers.

Our work starts where our clients' work happens: at the counter, in the classroom, in the field and in the HR office. We observe how teams operate, agree what success looks like, then build in short cycles so clients see working software early and often.

Cynaut is not a single-product vendor. We own a growing portfolio of homegrown software, we have the engineering depth to build bespoke systems, and we work alongside institutions as a long-term technology partner.

HOW WE CREATE VALUE

BUSINESS LINE 01

Proprietary software products

Subscription platforms we own, build and continuously improve — ready to deploy in days, not months.

- CertPOS · point of sale
- EduBridge · school management
- Patiya · sales management
- HRFlow · HR and payroll

BUSINESS LINE 02

Custom software & technology services

Engineering capacity to design, build and run systems shaped around a client's own processes.

- Bespoke web and mobile systems
- Integrations and automation
- Implementation and support
- Websites, IT supply and repair

BUSINESS LINE 03

Digital transformation, innovation & partnerships

Advisory, research and capacity building with institutions that want to modernise.

- Modernisation and consultancy
- Research and development
- Cynaut Academy and training
- Institutional partnerships

CYNAUT AT A GLANCE

FOUNDER-LED

Founded and led by Mercy Norah Namukose

BSc Software Engineering, Makerere University

ENGINEERING-LED

A leadership team of engineers

Software and computer engineering qualifications across the executive team

LOCAL PRESENCE

Headquartered in Kyanja, Kampala

Implementation, training and support delivered on the ground

EXECUTIVE LEADERSHIP

The people who lead Cynaut.

FOUNDER & CHIEF EXECUTIVE OFFICER

Mercy Norah Namukose

BSC SOFTWARE ENGINEERING · MAKERERE UNIVERSITY

Mercy Norah Namukose is a Software Engineering graduate of Makerere University and the Founder and Chief Executive Officer of Cynaut Technologies.

She leads Cynaut with a vision to build innovative, homegrown software solutions that respond to Africa's evolving needs. Her focus is on bridging the gap between technology and everyday challenges — turning ideas into impactful solutions that empower businesses, transform institutions and advance Africa's digital economy.

> "Technology should do more than solve problems; it should create opportunities, transform industries and shape the future."

Company strategy | Product vision | Partnerships

CHIEF TECHNOLOGY OFFICER

Lawrence Mawerere

BACHELOR'S DEGREE · SOFTWARE ENGINEERING

Lawrence drives Cynaut's technical vision, overseeing software architecture, product development and engineering excellence. He is committed to building robust, scalable and forward-thinking solutions that translate complex challenges into practical digital innovations, supporting Cynaut's mission to advance Africa's digital transformation.

SYSTEMS ENGINEER

David Hope Kinyonyi

BACHELOR'S DEGREE · COMPUTER ENGINEERING

David is passionate about technology, systems architecture and reliable, efficient solutions to complex technical challenges. He contributes to the design, development and optimisation of Cynaut's technology systems, ensuring they are scalable, dependable and aligned with the evolving needs of businesses and institutions.

WHAT GUIDES US

Purpose with a long horizon.

OUR VISION

To become a leading African technology company recognised for building innovative solutions that accelerate digital transformation and sustainable development.

OUR MISSION

To develop accessible, intelligent and reliable technology solutions that empower businesses, institutions and communities to operate more efficiently and achieve sustainable growth.

CORE VALUES

01
Innovation
We look for better ways to solve familiar problems, and we build what we learn back into our products.

02
Integrity
We scope honestly, price transparently and only promise what we can deliver.

03
Excellence
We hold our code, design and support to a standard our clients can depend on every day.

04
Collaboration
We work alongside our clients and each other, sharing knowledge openly from discovery to delivery.

05
Customer commitment
Our responsibility continues after go-live — through training, updates and responsive local support.

06
Social impact
We develop young Ugandan talent and build technology that strengthens communities and institutions.

OUR EXPERTISE

Capabilities that span the full lifecycle.

From a single internal tool to a full platform, our capabilities cover what it takes to build software, embed it in an organisation and keep it improving.

Build 01-04

01 Custom software development
Web systems and internal tools designed around how a business actually works.

02 Enterprise & business management systems
Multi-user, multi-branch platforms for sales, inventory, finance and people.

03 Web application development
Secure, cloud-based applications accessible from any browser.

04 Mobile application development
Android and iOS apps for customers, field staff and operations teams.

Transform 05-08

05 Business process automation
Replacing manual, paper-based routines with reliable automated workflows.

06 Systems integration
Connecting software with mobile money, payment gateways, CRM and analytics tools.

07 Digital transformation consultancy
Moving spreadsheets and ageing systems to modern platforms without losing data.

08 Education technology
Digital administration, assessment and parent engagement for schools and colleges.

Grow 09-10

09 Research & development
Continuous investment in our products, including data and AI-assisted features.

10 Technology training & skills
Practical courses, internships and corporate IT training through Cynaut Academy.

OPERATING PRINCIPLE

Every capability we sell is one we use ourselves — to build and run our own products.

Engineering capabilities

ACROSS OUR PRODUCTS AND CLIENT WORK

Cloud web platforms
Secure, multi-user, role-based systems accessible from any browser.

Offline-first operation
Software that keeps working without connectivity and syncs when back online.

Mobile applications
Android and iOS apps for customers, field teams and operations staff.

Payments & integrations
Mobile money, card and online payments, SMS and email, third-party APIs.

Data, reporting & documents
Live dashboards, PDF and Excel reporting, data imports and migration.

Security by design
Encrypted connections and storage, strong authentication, roles and audit trails.

CASE IN POINT

The EduBridge technology stack

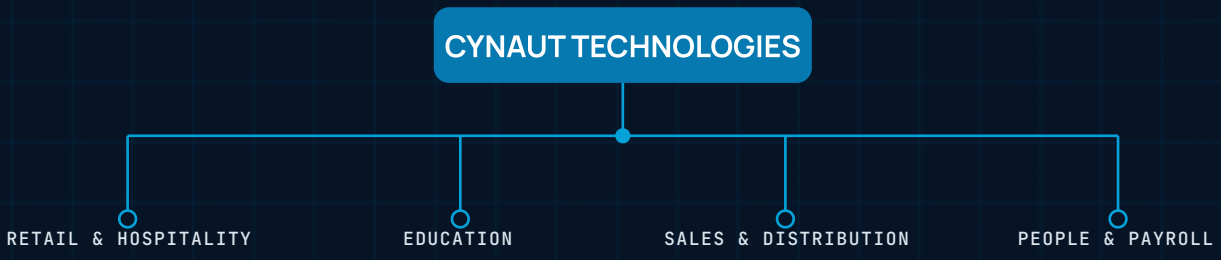

Stacks vary by product and client requirement.

TypeScript end to end · **Node.js** runtime · **Fastify** API · **PostgreSQL** database · **React** web app · **Offline-capable** web client · **S3-compatible storage** encrypted · **Argon2 & 2FA** sign-in security · **PDF & Excel** documents

BUSINESS LINE 01 · PROPRIETARY PRODUCTS

One company. Four products. One engineering team.

Cynaut Technologies is the parent company behind a growing portfolio of proprietary software. Each product addresses a distinct operational need, and all share the same engineering standards, implementation approach and Kampala-based support team.

POINT OF SALE

CertPOS

Point of sale and retail management that connects the counter, stock, staff and reports in one system.

Retail shops · Supermarkets · Restaurants · Pharmacies

SCHOOL MANAGEMENT

EduBridge

An integrated platform for admissions, attendance, marks, report cards, fees and parent communication.

Primary & secondary schools · Colleges · Training institutions

SALES MANAGEMENT

Patiya

Field-sales monitoring that puts sales, targets, expenses and banking on every rep's phone in real time.

Sales teams · Distributors · Manufacturers · Retail chains

PEOPLE & PAYROLL

HRFlow

Employee records, leave, attendance, payroll and performance in one secure HR system.

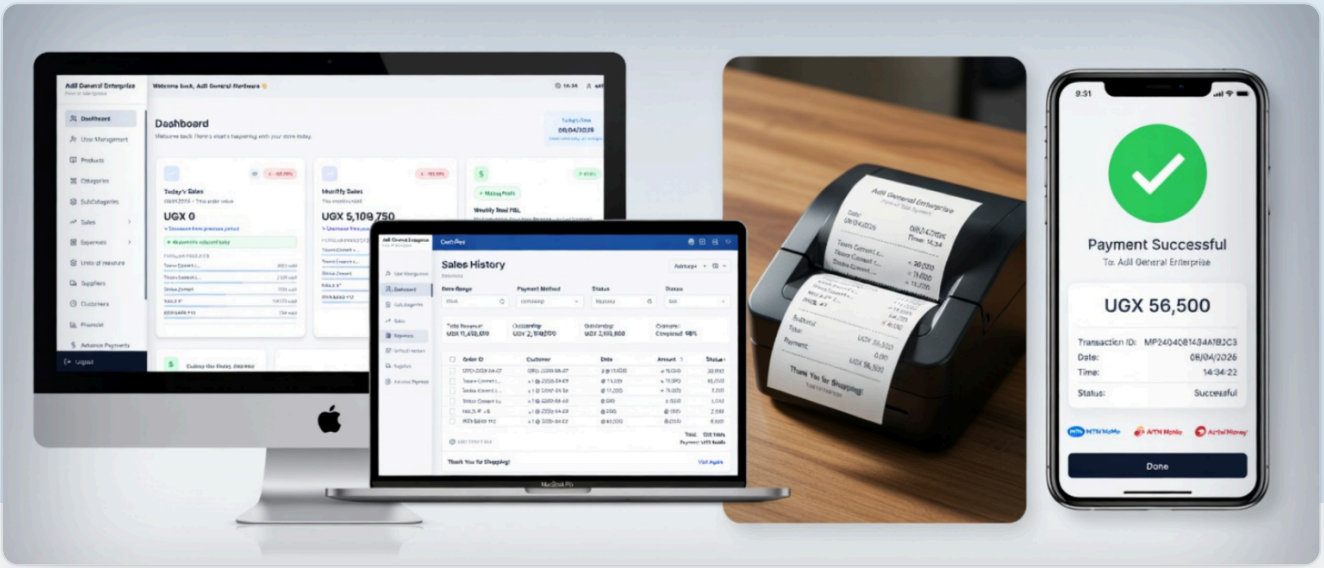

SMEs · NGOs & government · Hospitals · Hotels · Manufacturers

All four products are in market today and offered as subscription packages, with a free demonstration, set-up, data migration and staff training included. Capabilities shown on the following pages are current product features, as published on the product websites.

POINT OF SALE · PRODUCT 01

CertPOS

WWW.CERT-POS.COM ↗

The point of sale that keeps your shop moving.

CertPOS connects the counter, stock, staff and reports in one system — so businesses sell faster, stop losing stock and know their real profit every week. It keeps working when the internet or power does not.

BEFORE	WITH CERTPOS
Sales written in a notebook	Every sale recorded at the till automatically
Stock counted by hand; shortages found too late	Live stock levels with low-stock alerts
No clear idea of real profit	Weekly profit and loss, calculated for you
Each branch reports its own way	Every branch on one dashboard

Checkout & payments

- Barcode and QR scanning, discounts, split bills
- Cash, cards, MTN MoMo and Airtel Money
- Printed and digital receipts

Inventory

- Live stock and low-stock alerts
- Variants, bundles, suppliers, expiry tracking
- Automatic deduction on every sale

Insight & reporting

- Daily, weekly and monthly sales
- Best sellers, peak hours, margins
- Weekly real P&L; export to Excel or PDF

Operations

- True offline mode with auto-sync
- Multi-branch, multi-user control
- Customer records, loyalty, cloud backup

PURPOSE

Run the counter, stock and profit reporting from one system — online or offline.

TARGET MARKET

Retail shops, supermarkets, restaurants, pharmacies, manufacturers and service businesses.

AVAILABILITY

Subscription: Starter, Premium and Enterprise plans, with a 30-day free trial.

SCHOOL MANAGEMENT · PRODUCT 02

EduBridge

School management, made simple.

Paper registers and fee books cost teachers hours, let unpaid fees slip through and leave parents in the dark until the end of term. EduBridge brings admissions, attendance, marks, report cards, fees and parent communication into one platform — so staff spend less time on paperwork and more time on teaching.

ONE PLATFORM, A VIEW FOR EVERY ROLE

Teachers

Registers in seconds; marks entered once.

Head teachers

Marks approved and turned into report cards without retyping.

Bursars

Billed, collected and owed — every shilling accounted for.

Parents

Results, notices and fees on their phone, by portal and SMS.

Learners & academics

- Admissions and student records
- Attendance and timetables
- Gradebook; report cards from your templates

Fees & finance

- Automated billing and defaulter tracking
- Aged debtors, cash book, CSV export
- Financial reports for any period

Administration

- Parent & student portals, SMS, email
- Roles, permissions and audit log
- Library, inventory and leadership analytics

PURPOSE

Digitise school administration, academics, fees and parent communication.

TARGET MARKET

Primary and secondary schools, universities and colleges, training institutions.

AVAILABILITY

Subscription packages sized to the school, with set-up and training included.

SALES MANAGEMENT · PRODUCT 03

Patiya

Know where every sale stands — in real time.

When agents report sales, expenses and banked cash on paper at the end of the day, managers are always a day behind and gaps are hard to trace. Patiya puts sales, targets, expenses and customer accounts in one app, so representatives record their day from the field and managers see the numbers as they happen.

BEFORE	WITH PATIYA
Reps report at the end of the day	Sales recorded from the field as they happen
Targets tracked in spreadsheets	Live targets and progress for every rep
Leads and follow-ups forgotten	Automated follow-ups on every lead
Managers wait for weekly reports	Dashboards for every role, updated in real time

Field tools

- Make a sale; record bank deposits
- Record expenses; issue samples
- Add products from any phone

Performance

- Monthly targets per rep and branch
- Total sales, cash at hand, cartons sold
- Role-based dashboards for reps to executives

Customers & insight

- Leads, contacts and account management
- Shared pipelines and activity feeds
- AI-assisted forecasting and lead insights

PURPOSE

Give managers real-time visibility of field sales, targets, expenses and banking.

TARGET MARKET

Sales teams, distributors, manufacturers, retail chains, multi-branch businesses.

AVAILABILITY

Subscription packages, with set-up and training included.

PEOPLE & PAYROLL · PRODUCT 04

HRFlow

Your people, payroll and paperwork — in one place.

When staff files live in cabinets, leave is requested on paper and payroll is rebuilt from spreadsheets every month, errors and delays creep in. HRFlow centralises employee records, leave, attendance, payroll and performance, so HR runs on facts instead of files — from anywhere.

THE EMPLOYEE LIFECYCLE, CONNECTED

01 Recruit
02 Onboard
03 Records & documents
04 Leave & attendance
05 Payroll
06 Performance
07 Reports

01
Employee records
Details, contracts and history in one secure place.

02
Leave & attendance
Requests, approvals and tracking without paper forms.

03
Payroll processing
Payroll run from up-to-date records and attendance.

04
Performance reviews
Goals, reviews and a record of each employee's progress.

05
Recruitment & onboarding
Candidate tracking and a clear onboarding checklist.

06
Document management
HR documents stored digitally and found in seconds.

07
HR analytics
Headcount, leave, payroll and performance reports for management and audit.

08
Fair processes
Consistent records and approvals that support transparent decisions.

BEFORE	WITH HRFLOW
Employee files in cabinets	Every record and document in one secure place
Leave requests on paper	Leave requested and approved online
Payroll rebuilt from spreadsheets each month	Payroll run from up-to-date records
Reviews that never happen	Performance reviews with tracked goals

PURPOSE
Centralise employee records, leave, attendance, payroll and performance.

TARGET MARKET
SMEs, NGOs and government, hospitals and clinics, hotels, manufacturers.

AVAILABILITY
Subscription packages, with set-up, data migration and training included.

BUSINESS LINES 02 & 03 · SERVICES

When you need something built for you.

LINE 01 · PRODUCTS

Adopt a proven system

Cynaut-owned platforms licensed by subscription, configured for each client and live quickly.

LINE 02 · CUSTOM ENGINEERING & SERVICES

Commission your own

We scope, design, build and support software around your processes — from one tool to a full platform.

LINE 03 · TRANSFORMATION & PARTNERSHIPS

Transform with a partner

Advisory, modernisation, training and long-term collaboration with institutions.

01	**Bespoke software development**	Web systems, internal tools and automation built around how your organisation actually works.	LINE 02 · BUILD
02	**Website design & development**	Fast, mobile-friendly websites shaped around your goals — enquiries, bookings or credibility.	LINE 02 · BUILD
03	**Mobile application development**	Android and iOS apps for customers, field staff and operations teams.	LINE 02 · BUILD
04	**IT consultancy & modernisation**	Moving spreadsheets and ageing systems to secure, cloud-based platforms without losing data.	LINE 03 · ADVISE
05	**Systems implementation**	Installation, configuration, data migration and go-live support for new systems.	LINE 02 · DEPLOY
06	**Maintenance & support**	Updates, fixes and phone support from our Kampala team, Monday to Friday, 9:00 am – 6:00 pm.	LINE 02 · SUSTAIN
07	**Business process automation**	Replacing repetitive manual tasks with reliable, auditable digital workflows.	LINE 03 · TRANSFORM
08	**IT supply & repair**	Office hardware supply, installation, repair and maintenance from one accountable team.	LINE 02 · EQUIP
09	**Technology training & internships**	Short courses, corporate IT training and internships on live client projects.	LINE 03 · DEVELOP

INDUSTRIES WE SERVE

Built for the sectors that keep Uganda running.

Our products are designed for specific operational settings, and our engineering services extend to any sector that needs dependable software.

SECTOR	CertPOS POINT OF SALE	EduBridge SCHOOLS	Patiya SALES	HRFlow HR & PAYROLL	Custom ENGINEERING

✓ Product designed for this sector, with typical use + Delivered through custom engineering and web services

HOW WE WORK

A clear process, and a team that stays after launch.

Clients see the screens and a fixed scope before any code is written, then receive working software every two weeks. No surprises at the end.

01	Discovery & needs assessment	We visit, observe how your team works today and agree on what success looks like.	YOUR ROLE Share processes, pain points and goals
02	Research & solution architecture	We define the scope, data model, integrations and the right mix of product and custom build.	YOUR ROLE Confirm priorities and constraints
03	Design & development	You approve the screens and scope first; we then build in two-week cycles and demonstrate progress.	YOUR ROLE Review each release and give feedback
04	Quality assurance & testing	Functional, data and user-acceptance testing against real scenarios from your operation.	YOUR ROLE Test with real users and sign off
05	Deployment & implementation	We install, configure and move your existing records across without losing data.	YOUR ROLE Provide data and confirm go-live
06	Training & onboarding	Hands-on training for each role, so your team is ready on day one.	YOUR ROLE Nominate users and champions
07	Maintenance & continuous improvement	Updates, fixes and local phone support, with enhancements as your needs evolve.	YOUR ROLE Tell us what to improve next

WHY CYNAUT

Seven reasons organisations choose to work with us.

01 **Built around real-world challenges**
Every product began with a problem we saw first-hand — on a shop floor, in a school office or with a field team.

02 **Understanding of African business environments**
Offline operation, mobile money and local ways of working are designed in, not added later.

03 **Scalable and adaptable technology**
Start with one terminal, one school or one team, then grow to multiple users and branches on the same system.

04 **Customer-centred development**
You see the screens before code is written and working software every two weeks.

05 **Innovation-driven approach**
Continuous product investment, including data and AI-assisted features where they add real value.

06 **Long-term technical support**
A Kampala-based team handles set-up, training, updates and phone support after go-live.

07 **Commitment to practical transformation**
We measure success by adoption and results — not by the size of the system delivered.

ONE ACCOUNTABLE PARTNER

Products, custom builds, hardware, training and support — from a single team.

INCLUDED WITH EVERY PRODUCT

01	02	03	04
Free demo first	**Set-up & data migration**	**Staff training**	**Local support**
See it working before you commit	We move your records across	Your team is ready on day one	Mon – Fri, 9:00 am – 6:00 pm

ORGANISATIONS THAT HAVE WORKED WITH US

Uganda Police Force | Electricity Regulatory Authority | Makerere University | Kampala International University | Nyange Resort and Marina | Tara Advocates | Gem Africa | Safari Skies | Kigambira Safari Lodge | Nkembo Africa Safaris

Organisations listed as clients at www.cynaut-tech.com, November 2026.

IMPACT

Technology with a local impact.

We hire and train young Ugandans, help schools run on less paper and build efficient software that does more with less infrastructure — supporting quality education, decent work and inclusive growth.

WHAT WE DO TODAY

YOUTH SKILLS

Cynaut Academy

Internships and bootcamps put students and graduates on live client projects, mentored by the engineers behind our products, with a certificate on completion.

DIGITAL SKILLS

Practical courses & corporate training

Short courses in web and mobile development, UI/UX, databases, data and AI, Git and agile teamwork — in person in Kampala, hybrid or online.

DIGITAL INCLUSION

Affordable, local technology

Subscription software with offline operation and mobile money, so small businesses and schools can digitise without heavy upfront investment.

CYNAUT ACADEMY CURRICULUM

- Web development
- Mobile apps
- UI/UX fundamentals
- Database design
- Data and AI
- Git and GitHub
- Agile teamwork
- Real client projects
- Code reviews

WHY IT MATTERS

Graduates often leave school with theory but little hands-on experience, while businesses struggle to find developers who can build real software. The Academy closes that gap and grows the talent Cynaut and the wider industry need.

Current contribution — Evidenced today

4 QUALITY EDUCATION

EduBridge cuts school administration so teachers can teach; the Academy builds practical digital skills.

8 DECENT WORK & GROWTH

We hire and train young Ugandans, and our products help SMEs formalise, track profit and grow.

9 INDUSTRY, INNOVATION & INFRASTRUCTURE

Homegrown, locally supported software that brings modern digital systems within reach of SMEs and institutions.

Future ambition — Commitment

5 GENDER EQUALITY

Widen women's participation in software careers through Academy places, mentoring and hiring — led by a woman founder.

13 CLIMATE ACTION

Reduce paper through digital records and receipts, and build lightweight software that needs less hardware.

The Sustainable Development Goals are used here as a framework for describing Cynaut's contribution. Cynaut Technologies has no formal affiliation with the United Nations.

FIVE-YEAR ROADMAP

From a Kampala software house to a recognised African technology company.

Our strategy is to deepen what already works — our products and our client relationships — and then extend it across the region through partnerships and sustained investment in research and development.

MARKET FOCUS · UGANDA

YEAR 1

Strengthen

Product & customer excellence

- Strengthen the four existing products
- Improve onboarding and customer experience
- Grow the customer base in Kampala and beyond

YEAR 2

Deepen

National reach & partnerships

- Expand product capabilities
- Increase market penetration across Uganda
- Establish distribution and institutional partnerships

MARKET FOCUS · EAST AFRICA

YEAR 3

Enter

First regional markets

- Pilot proven products in selected East African markets, with local partners
- Invest further in innovation

YEAR 4

Scale

Regional operations

- Scale operations and support across East Africa
- Strengthen research and development
- Build institutional partnerships

AFRICA

YEAR 5

Recognised

An African technology company

- Sustainable portfolio of products and services
- Readiness for wider African markets

PILLAR 01

Products that scale

Deepen CertPOS, EduBridge, Patiya and HRFlow, and bring new products to market as they are ready.

PILLAR 02

Partnerships that extend reach

Distribution, technical and institutional partners to take proven solutions to new markets.

PILLAR 03

People and R&D

Grow engineering talent through the Academy and invest in research that keeps products ahead.

This roadmap sets out Cynaut Technologies' strategic ambition. It is indicative and is not a forecast or a guarantee of future results.

BUSINESS LINE 03 · PARTNERSHIPS

Your implementation and innovation partner.

From a single deployment to a national programme, Cynaut brings proprietary products, in-house engineering and on-the-ground delivery capacity in Uganda.

01	02	03	04
Proprietary IP	**In-house engineering**	**Local delivery**	**Talent pipeline**
Four in-market products we own and can adapt, extend or white-label.	A team that designs, builds and maintains systems end to end.	Implementation, data migration, training and support from Kampala.	Cynaut Academy develops engineers for projects and partners.

01 Government institutions

Local engineering capacity to digitise records, workflows and public services — with data held securely and staff trained to own the system.

Systems development · Modernisation · Implementation & training

02 NGOs & development partners

A delivery partner for programmes in education, skills and enterprise — with HR, data and field tools ready to deploy and a youth-skills pipeline.

Programme systems · Digital-skills initiatives · Co-funded pilots

03 Educational institutions

EduBridge for administration, fees and parent engagement; internships and practical training that connect students to real projects.

School-wide rollouts · Internships · Staff & student training

04 Corporate organisations

Proven systems for sales, stock, people and reporting, plus bespoke software and integrations for multi-branch operations.

Product subscriptions · Custom builds · Support agreements

05 Investors

A founder-led company with proprietary subscription products, an established Ugandan client base and a clear path to regional expansion.

Growth investment · Product & R&D · Market expansion

06 International technology partners

Local implementation, integration and support capacity for partners entering or growing in Uganda and East Africa.

Reseller & distribution · Integration · White-label
